

Biotinylated Cynomolgus EGFR Protein; His-Avi Tag

Product Information

Product Name	Biotinylated Cynomolgus EGFR Protein; His-Avi Tag
Storage temp.	Store at $\leq -70^{\circ}\text{C}$, stable for 6 months after receipt. Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.
Catalog# / Size	GM-87565RP-25 / 25 μg GM-87565RP-200 / 200 μg

Protein Information

Alternative Names	EGFR, ERBB, ERBB1, HER1, PIG61
Source	Biotinylated Cynomolgus EGFR Protein; His-Avi Tag (GM-87565RP) is expressed from human 293 cells (HEK-293). It contains AA Met 1 - Ser 645 (Accession # XP_005549616.1). This protein carries a His-Avi tag at the C-terminus.
Purity	> 90% as determined by SDS-PAGE
Endotoxin	< 1 EU/ μg , determined by LAL gel clotting assay
Predicted Mol Mass	70.8 KDa
Formulation	Supplied as a 0.2 μm filtered solution of PBS, pH7.4.
Description	<p>EGFR (Epidermal Growth Factor Receptor) protein is a receptor tyrosine kinase (RTK), belonging to the tyrosine kinase receptor family. EGFR is widely expressed in various cell types, including epithelial cells, nerve cells, and muscle cells. Activation of EGFR typically occurs through binding to its ligand (such as EGF), triggering its autophosphorylation and activating its tyrosine kinase activity. Activated EGFR then initiates a series of signaling pathways, including Ras-MAPK, PI3K-Akt, among others, thereby influencing cell physiological functions.</p> <p>EGFR plays a significant role in many types of cancers because abnormal EGFR signaling pathways can lead to excessive cell proliferation and malignant transformation. Therefore, EGFR has become one of the important targets for cancer treatment, with anti-cancer drugs targeting EGFR, such as EGFR inhibitors, being widely researched and applied in clinical therapy. EGFR holds importance in cell biology and cancer research, playing a crucial role in understanding cell signaling and cancer development mechanisms.</p>

Version:3.3

SDS-PAGE

On SDS-PAGE under reducing (R) condition. The gel was stained overnight with Coomassie Blue. The purity of the protein is greater than 90%.

Bioactivity-ELISA

Bioactivity-ELISA

0.1 μ g Biotinylated Cynomolgus EGFR Protein; His-Avi Tag of per well

Biotinylated Cynomolgus EGFR Protein; His-Avi Tag (Catalog # GM-87565RP) was immobilized at 1 μ g/ml (100 μ L/well) on streptavidin precoated. Increasing concentrations of Anti-H_EGFR hIgG1 Antibody(Necitumumab) (Catalog # GM-49155AB) were added.
